

## Dilek KAZAN, PhD

**Professor**  
**Marmara University**  
**Faculty of Engineering,**  
**Department of Bioengineering,**  
Goztepe Campus, 34722  
Kadıköy-Istanbul-Turkey

**e-mail :** [dkazan@marmara.edu.tr](mailto:dkazan@marmara.edu.tr)

**Tel :** +90 (532) 412 49 86

Professor Kazan's research range from Chemical Engineering to Bioprocess Engineering. She has carried out collaborative research work to screen, isolate and characterize extremophiles to produce biobased materials (pharmaceuticals, industrial enzymes and biopolymers) with novel properties; to purify, characterize and stabilize proteins for industrial applications; to develop and optimize efficient and sustainable bioprocesses; and to produce biopolymers for biomedical applications. Her research also covers proteomics and metabolomics to understand the response of living cells to extreme conditions. With the knowledge gained from the projects and research activities performed, her most important mission is to achieve research activities through using bioprocess engineering tools within the green chemistry approach to contribute the creation of sustainable environment and society. In order to commercialize her research work, she founded BacPolyZyme Bioengineering LLC. BacPolyZyme provides basic and advanced bioprocess related services for manufacturers that want to produce industrial enzymes, biofuels, organic acids, biopolymers, and pharmaceuticals through fermentation processes.

### **ACADEMIC POSITION**

Professor	Marmara University, Istanbul, TR Department of Bioengineering 2004 - present
AssociateProfessor	Marmara University, Istanbul, TR Department of Chemical Engineering 2001 - 2004
Seniour Scientist	The Scientific and Technological Research Council of Turkey (TUBITAK), Kocaeli, TR, Genetic Engineering and Biotechnology Institute (GEBI) 1994 -2001
Research and Teaching	Boğaziçi University, Istanbul, TR

Assistant

Department of Chemical Engineering  
1984 - 1994

## **EDUCATION**

- PhD           Boğaziçi University, Istanbul, TR  
Department of Chemical Engineering  
1988 – 1993
- MSc           Boğaziçi University, Istanbul, TR  
Department of Chemical Engineering  
1984 – 1987
- BSc           Istanbul Technical University Istanbul, TR  
Department of Chemical Engineering  
1979 - 1983

## **APPOINTMENT**

- Founder, General Manager           BacPolyZyme Biyomühendislik Ltd. Şti  
2019
- Vice Head of Department           Marmara University, Istanbul, TR  
Department of Bioengineering  
2009 – 2012/2014 – 2019  
Department of Chemical Engineering  
2002 – 2006
- Head of Department                 Marmara University, Istanbul, TR  
Department of Bioengineering  
2011 - 2014
- Member of BAPKO Committee       Marmara University, Istanbul, TR  
2014 – 2018
- Vice Dean                             Marmara University, Istanbul, TR  
Faculty of Engineering  
2006 – 2009
- Member of Faculty Committee       Marmara University, Istanbul, TR  
Faculty of Engineering  
2002 – 2003/2006 – 2009
- Member of Institute Committee      The Scientific and Technological Research Council of  
Turkey  
(TUBITAK), Kocaeli, TR,  
Genetic Engineering and Biotechnology Institute (GEBİ)  
2000 -2001

## **PATENT**

*Mandacı, S., Seyhan, F., Öngen, G., Erarslan, A.A., Kazan, D., et al., "Production of xylanase enzyme for feed additives and methods for preparation of powder and coated form of the enzyme", TURKEY, Patent, Submission date: 2014/04579, January 2014, patent date: 22/04/2019*

*Kayaman, N., Kazan, D., Erarslan, A., Okay, O., Baysal, B., "Application Number: TR96 / 00295, Production of Temperature Sensitive Gel Beads for Concentrating Dilute solutions of Biological Materials" T.C. Turkish patent Institute, Acception date: 03/01/1997.*

## **SELECTED PROJECTS**

*TUBITAK-BIDEB New opportunities in the development of biopharmaceuticals: the manufacture of therapeutic proteins / enzymes and microbial therapies ., TUBITAK-BIDEB 119C168 (Project Manager) 2020-2027 (In colalboration with ATABAY PHARMACEUTICALS AND FINE CHEMICALS INC.)*

*Production of enzymatically synthesized biocompatible and biodegradable microbial polymers by sustainable and economical processes, KOSGEB, (**Project manager**), 2019-2021 (BacPolyZyme Bioengineering Ltd. Şti. was founded)*

*Synthesis of biodegradable HA-PHB carrier systems by click reactions and tissue engineering applications, FEN-B-170419-0120, (**Project manager**), 2019-2021*

*Biomedical application of biopolymers from renewable sources, FEN-C-DRP-170118-0011 (Project manager), 2018-2020*

*Production of Bio-similar Pharmaceuticals "TUBITAK-KAMAG-1007 Project" (**Project Manager**; In collaboration with İstanbul Technical University & with Zeynep Atabay/Atabay Pharmaceutical Company) , 2016-2020*

*Purification and characterization of lipase from Cryptococcus species isolated from Petroleum Sludge, FEN-C-YLP-141118-0594 (**Project manager**), 2018-2019*

*Production of biocellulose-PHB blend polymers and their applications in biomedical area, FEN-C-YLP-120417-0175 (**Project manager**),2017-2018*

*Production of Poly(3-hydroxybutyrate) from Novel Bacillus marmarensis GMBE 72T isolated from mushroom compost: FEN-C-YLP-080715-0341(**Project Manager**), 2015-2016*

## **Projects before 2015**

*Production of fermentable sugars by hydrolyses of hazelnut husk, TUBITAK: 113M053 (**Project Manager**)*

*Determination of lipid profiles of microalgae in order to determine biofuel productivity, -*

*FEN-A-090512-0162. (Project Manager)*

*Formulation of alkaline protease for liquid detergent, KOSGEB. (Consultant)*

*Using recycled protein waste for *Oncorhynchus mykiss* feed as an alternative protein source, TUBITAK-TEYDEB. (Consultant)*

*Production of industrial enzymes intended for feed industry. TUBITAK:*

*KAMAG-107G246. (Researcher) (In collaboration with Prof Dr Burhan Arina, Prof Dr Sadik Dinçer and*

*Prof Dr Hatice Korkmaz Güvenmez/ Çukurova University; Prof Dr Gaye Öngen/Ege University; Assoc Prof Dr Sevnur Mandacı/ TUBITAK-MAM-GMBE)*

*Investigation of the kinetic parameters of *Bacillus subtilis* SDP1 amylase immobilized on magnetic alginate gels-FEN-D-280214-0047 (Project Manager)*

*Immobilization of lipase on magnetic-nano particles- FEN-C-YLP-060510-0142-(Project Manager)*

*Proteomic Investigation of the adaptation of *Halomonas halophila* DSMZ4770 at high salt concentration and low temperatures - FEN-D-040609-0179, (Project Manager)*

*Proteomic analysis of the metabolic pathways of halophilic microorganisms and flux analysis – FEN-C-DRP-181208-0286, (Project Manager)*

*Production of amylase enzyme from agricultural waste using *Halomonas* sp. isolated from Çamaltı Saltern Area FEN-YLS-290506-0115, (Project Manager)*

*Extremophiles as source of natural products useful for biotechnological applications: Studies of osmoregulation strategies by engineering tools. TUBITAK: TBAG-110T174. (Project Manager) (In collaboration with Assoc Prof Annarita Poli and Prof Barbara Nicolaus/ CNR-ITALY)*

*Proteomic Analyses of Kidney Transplantation Solutions . TUBITAK: SBAG-110S103. (Project Manager at*

*Marmara University) (In collaboration with Prof Dr Abdurrahman Coşkun/ Acibadem University)*

*Establishment of Bioremediation Laboratory in the Bioengineering Department. Marmara University Research Fund Project, FEN-E.-. (Project Manager)*

*Production and characterization of phytase enzyme for animal feed. Marmara University Scientific Research Project: FEN-C-DRP-171108-0267. (Project Manager)*

*Establishment of Microbial resource Center Infrastructure for Enzyme Industry in Turkey. T.R. Prime Ministry State Planning Organisation (DPT), conducted at TUBTAK MRC, GEBİ. (Project Manager)*

*Investigation of the effect of environmental conditions on newly isolated halophilic microorganisms by proteomics. TUBITAK: MAG 104M236. (Project Manager)*

*Production of alpha-amylase from Halomonas sp. isolated from Çamaltı Saltern Area by agricultural waste. Marmara University Scientific Research Project: FEN-YLS-290506-0115. (Project Manager)*

*Identification of archaea isolated from extreme environments in Turkey and extremozymes of these microorganisms. TUBITAK: TBAG 103T069. (Project Manager) (In collaboration with Dr Aziz Akın Denizci/TUBITAK-MRC-GEBİ)*

*Stability, conformational characterization and biocatalytic applications of native and modified alkaline proteases purified from alkaliphilic Bacillus strains. conducted at TUBTAK-MRC, GEBİ. TUBITAK: TBAG-U/123 (104T262).(Researcher) (in collaboration with Prof Francesco Secundo/CNR-Italy)*

*BIOCHIPBOARD (Fungal enzymes on the production of whitelined chipboard: technological and economic implications. conducted at TUBTAK-MRC, GEBİ (In collaboration with Prof Candan Tamerler/İTÜ; Prof Tajelli Keshewards/University of Westminster, KARTONSAN). EUREKA: E2184. (Coordinator)*

*Isolation and identification of industrially important protein producing bacteria from local ecosystems. TUBITAK: GMBAE F990201. (Project Manager) conducted at TUBTAK-MRC, GEBİ.*

*Identification of alkaline protease producing microorganisms from local ecosystems and production and purification of alkaline protease enzyme. Marmara University Scientific Research Project: BSE 073/131102. (Project Manager)*

*Traditional and modern solutions for lactose deficiency in Turkey: Production and development of lactase enzyme used in milk industry, YUUP-DPT (T.R. Prime Ministry State Planning Organisation BAP08-11-DPT 2005K120570. (Project Manager at Marmara University Site) (In collaboration with Prof Şebnem Harsa/ İzmir Institute of Technology)*

*Determination of anti-viral, anti-microbial and anti-oxidant activity of whey proteins and hydrolysates and determination of structural properties. TUBITAK: SBAG. (Project Manager at Marmara University Site)( In collaboration with Prof Süha Yalçın/Marmara University and Prof Nazlı Arda/İstanbul University)*

*Sub-Project 2.2 Penicillin Acylase Production in “Biotechnology-Establishment and Promotion of New Biotechnological Techniques in Turkey (NATO-TU BIOTECHNOLOGY)” NATO-SFS (TUBİTAK-MAMGMBAE) (Researcher) conducted at TUBTAK-MRC, GEBİ.*

### **BSc Projects (TUBITAK-2209)**

*Production of 3D Scaffold by using biopolymer blend (Elif Nur AVCI and Tuğçe KORKMAZ)  
TUBITAK-2209B, 2019*

*Effect of oxygen transfer on biopolymer production (Esmâ DERİN and Belkıs GÜNEŞ),  
TUBITAK-2209A, 2019*

### **Projects before 2015**

*Investigation of the inactivation kinetics of Bacillus licheniformis BA17 alkaline protease at different pH values (Murat ÖZKAN, Chemical Engineering Department)*

Optimization of Phenol Removal using *Halomonas* sp. AAD12 (Fatma Ece ALTINIŞIK,  
Bioengineering Department)

## **SUPERVISIONS**

### **MSc Thesis**

- Fermentation of Enzymatically Saccharified Agricultural Residue for Ethanol Production (Selim Ceylan)

- Isolation and Identification of Extremophiles Isolated from Camalti Saltern Area (Bahar Yavuzturk)
  - Purification and Characterization of Alkaline Protease produced by *Bacillus* sp. Isolated from Local Ecosystems (Selcuk Ozturk)
- Production and purification of RTEM-e beta-lactamase and Its Inhibition by peptides (Naze Gul Avci' Co-advisor)
- Investigation of the effect of Antimicrobial Agents on Microorganisms (Çağakan Özbalcı, Coadvisor)
- Amylolytic Enzyme Production from a Moderately Halophilic Bacteria by Using Agricultural Waste (Kamil Serkan Uzyol)
- Investigation of The Kinetics of *Bacillus subtilis* SDP1 alpha amylase immobilized on Magnetic Alginate Beads (Eda Bal)
- Production of Polyhydroxyalkalonate from Extreme Obligate Alkaliphilic Strain *Bacillus marmarensis* GMBE 72<sup>T</sup> isolated from Mushroom Compost (Tugba Ozgoren)
- Production of Cellulosic and Polyhydroxybutyrate Based Polymers and Applications in Tissue Engineering (Gülnehal Bozdağ)
- Small Scale Bioprocess Development and Immobilization of Lipase from *Cryptococcus albidus* (Abdussamed Uras)
- Purification and Characterization of Lipase Produced by *Cryptococcus species* isolated from Petroleum Sludge and Investigation its Usage in Pharmaceutical Industry (Esra Büyük)
- Development and Optimization of Purification Processes for Hyaluronic acid (Özge Buldağ)
- Development of Bacterial Cellulose and PLGS Blend for Skin Diseases (Fulya Çalman)
- Synthesis and characterization of biodegradable HA-PHB carrier systems by click reactions for tissue engineering applications (Berken Açıkgöz, Co-advisor)
- Synthesis of Biodegradable Bacterial Cellulose-Hyaluronic Acid Scaffold by Click Reactions (Şeyma Turan, Co-advisor)
- Development of lateral flow assay that immobilize VEGF-A/PD-L1 proteins (Ali Mişe)

## **PhD Thesis**

- Isolation and Identification of Industrially Important Protein Producing Bacteria from Local Ecosystems and Screening of Their Proteins (Hülya Bal)
  - Proteomic Study and Flux Analysis of Metabolic Pathways of Halophilic Microorganisms (Selim Ceylan)
- Investigation of the Industrial Enzymes Produced by *Bacillus* sp Isolated from Acacia Tree (Hasan Ümit ÖZTÜRK)
  - Catalytic Cracking of Waste Cooking Oil Using Low Cost Catalysts (Kamil Serkan Uzyol)
  - Production of Polymeric Nanomaterials from Renewable Sources for Biomedical Applications (Elif Işıkcı Koca)
  - Optimization of poly(3-hydroxybutyrate) production from a novel obligate alkaliphilic *B. marmarensis* (Yağmur Atakav)

## **COURSES AND WORKSHOPS**

## A. Organised

- From Network to Targets: Workshop on Omics Technologies and Applications, 7-9 July 2017
- III.BIOENGINEERING STUDENT CONGRESS, 12-13 March 2015
- Introduction to Proteomics II, 1-5 September 2008
- Introduction to Proteomics I, 24-27 April 2007
- Meetings on Identification of Food Microbiology, M.Ü. Eng. Faculty. 30 September 2005 ➤  
Mass Spectrometer and Proteomics Workshop, M.Ü. Eng. Faculty. 16-18 August 2004
- Enzyme Immobilization and Applications, TUBITAK-MAM-GMBAE, 12-16 July 1999
- Basic techniques for Enzyme Purification and Characterization, TUBITAK-MAM-GMBAE,  
Between 1998-2009 every year
- *Basic Principles and Applications in Enzyme Engineering*, TUBITAK-MAM-GMBAE, 13 - 19  
July, 1997

## B. Invited

- Bioengineering Days., Yıldız Technical University., 2018
- Purification and Immobilization of Enzymes, 6th April 2014, II Bioengineering and Genetic Days, Yeditepe University, İstanbul
- Conversion of Lignocellulosic Materials to Fermentable Sugars, 16th March 2014, Ege University, II. Bioengineering Student Congress, İzmir; 17th March 2014, Energy Days, KMMO Student Days, Marmara University
- Proteom Technologies for Drug Development, 16-17 Mach 2013, KMMO Student Days, İTÜ  
➤ Metabolomics: Proteomİstanbul, İstanbul University, Molecular Biology and Genetic Department, 15-17 July 2013
- Metabolomics: Proteomİstanbul, İstanbul University, Molecular Biology and Genetic Department, 12-17 July 2010
- Biotechnological Applications and potentialities of moderately halophilic bacteria ○ Turkish-German Workshop on Biotechnology and Bioengineering, 21-22 September, 2010, Aachen, Germany
- Introduction to Proteomics.
- Proteomic Arařtırmaları: Temel Bilgiler ve Uygulamalı Örnekleri, 10-11 December 2009, İstanbul
- BIOTECHNOLOGICAL APPLICATIONS AND POTENTIAL OF MODERATELY HALOPHILIC BACTERIA, İstanbul Technical University, Molecular Biology and Genetic Department, 2009
- Biohydrogen Production and Industrial Applications, 14-15 April 2005, TÜBİTAK, GMBAE  
➤ Gene Cloning and Expression in Procaryotic Systems, 2-13 July 2001 , 3-14 July 2000, and 516 October 1998, TÜBİTAK, GMBAE
- Molecular Biology Course, 28 June-09 July 1999, TÜBİTAK, GMBAE

## C. Attended

DATE	NAME OF THE COURSES
02-03 May 2001	Marketing Analysis, TÜSSİDE
05-06 April 2001	Customer Relations and Sales Techniques, TÜSSİDE
16-18 May 2001	Project Management Course, S&Q Mart

06-09 March 2000	“Biotechnology and Technology” (Production of Fungal Enzymes) British Council-Ege University İzmir-Turkey
08-10 January 1999	Business Excellence Model, TÜSİAD-KALDER
12 December 1996	<i>Time Management, Kogem, Arçelik</i>
11 December 1996	Teamwork and Leadership, <i>Kogem, Arçelik</i>
10 December 1996	<i>Total Quality Management, Kogem, Arçelik</i>
25-26 December 1996	<i>Project Management and Techniques, Kogem, Arçelik</i>
26-28 September 1996	VIII National Biophysic Congress, “ Applied Course for Molecular Biophysic and Biotechnological Applications”, Kocaeli-Turkey
10-14 July 1995	Program of The European Communities (MED Campus), “Down Stream Processes in Biotechnology”,
16-27 September 1991	NATO Advanced Study Institute on "Recent Advances in Biotechnology", Kuşadası, Turkey

## TEACHING RESPONSIBILITIES

### Undergraduate Courses

General Chemistry  
 Basic Principles in Chemical Engineering  
 Introduction to Biochemical Engineering  
 Chemical Kinetics  
 Bioengineering Principles  
 Bioreaction Engineering  
 Bioprocess Design I  
 Bioprocess Design II

### Graduate Courses

Reaction Kinetics and Mass Transfer  
 Enzyme Kinetics  
 Principles in Biotechnology  
 Molecular Techniques Used for Identification of Microorganisms  
 Enzyme and Fermentation Technology  
 Proteomics and Mass Spectrometer  
 Metabolomics  
 Enzyme Technology

## AWARDS

1. Best poster award : Coskun, A., Kazan, D., Akgöz, M., Berber, İ., Yazıcı, C., Bilsel, G., Karaosmanoglu, K., Sahin, J., Proteomics Profiling of Preservation Solution Prior to Renal Transplantation ‘5th Central and Eastern European Proteomic Conference, Prag, 19-21 September 2011,

2. Production of Industrial Enzymes for Feed Industry (YEM-EN)” TARAL 1007 Project, 2013 TÜBİTAK Marmara Research Center, within the scope of Research and Development, Technology Development Award.
3. Support Award from Marmara University Scientific Research Project Unit
4. “Production of Bioethanol from Lignocellulosic Waste: From husk to bioethanol” Research Award from AlbioBir
